Repair worn or damaged heating elements in electric heaters if the original replacement elements are no longer available. Kits include heating wire, isolators, and hardware to allow users to replace elements in duct heaters, electric furnaces, air curtains, and strip heaters.

Hazardous-Location Electric Cabinet Wall Heaters

Markel Products Company | QMARK

- Class I Div. 1 and 2 Groups B, C, and D
- Min. height from floor: 9" Markel®, 8" QMark®

Quiet, convection-style heaters used in hazardous industrial environments like petroleum refineries, gasoline storage areas, petrochemical facilities, and dry cleaning plants. Wall mount with included brackets. Thermostat not included.

Note: Required contactors sold separately on page 173. Required thermostats sold separately on page 3028.

GA GRAINGER APPROVED | fostoria Quality Since 1917

Indoor Suspended Infrared Radiant Electric Ceiling Heaters

Units use infrared radiant heating to quietly warm people and objects, not the ambient air, without taking up floor or wall space. Suspend from the ceiling to spot-heat areas in workshops, garages, and warehouses. May only be used indoors.

Solaira®

Indoor/Outdoor Suspended Infrared Radiant Electric Wall Heaters

- Beam pattern: 45°

Can withstand rain and are typically used to spot heat spaces like condominium terraces, gazebos, under patio umbrellas, and other low-clearance seating areas. Units use infrared radiant heating to quietly warm people and objects, not the air. Included bracket allows for vertical and horizontal orientation.

Electric Infrared Heater Selection Guide

DESIRED TEMP. RISE = Desired comfort temp. - average ambient temp.

WATTS REQUIRED =

For Indoor Spot Heating: Sq. ft. to heat x desired temp. rise

For Indoor Total Area/Building Heating: Sq. ft. to heat x desired temp. rise x 0.5

For Outdoor Spot Heating: Sq. ft. to heat x desired temp. rise x 2.0

For Outdoor Snow and Ice Control Heating Systems: Sq. ft. to heat x (avg. 85 to 110 watts/sq. ft.)

Note: Multiple heaters may be required to achieve required watts for desired coverage.

HEATING ELEMENTS

Flat Panel Emitters:
No glass materials. For indoor spot heating.

Quartz Lamp: For snow and ice control, indoor/outdoor spot heating, and indoor total area heating.

Quartz Tube: For indoor/outdoor spot heating and indoor total area heating.

Indoor/Outdoor Suspended Infrared Radiant Electric Ceiling Heaters

Quietly heat areas like entrances, patios, and bus shelters. Heaters withstand rain and provide snow and ice control. Can be ceiling- or wall-mounted with either an included or optional bracket. Units may be used with a variable heat controller.

Dayton® RE-VERBER-RAY® by Detroit Radiant Products Company INFRARED RADIANT HEATERS

Portable Gas Tank-Top Radiant Heaters

Note: LP tank not included.

Dayton®—Piezo ignition. Provide up to 48 hr. of spot heating on one 20-lb. cylinder. Corrosion-resistant steel construction with safety shut-off valve. No. 5RCC1 has dual swivel heads. Both are CSA Certified.

Re-Verber-Ray—Mount on standard DOT 20-lb. LP cylinder to provide temporary heat. Heaters feature a large ceramic burner assembly with highly polished aluminum reflector and stainless steel emitter rods for enhancing radiant output and heater efficiency. Heavy-gauge cylinder mounting bracket, safety shutoff valve, tip-over safety device, excess flow fitting, and 2-ft. UL-Listed connecting hose with regulator. Use in upright (vertical) position only.

WARNING: Use in well-ventilated or open areas only. Not for use in homes, mobile homes, tents, RVs, campers, or other spaces with limited ventilation. Always observe published clearances to combustibles.

Dayton®

Gas-Fired Infrared Stainless Steel Patio Heaters

- Stainless steel housing

Uniform infrared pattern quickly heats people, objects, and the surrounding air. Wind- and rain-protected design with aluminum grille. Constructed with water-resistant electrical components.

Mounting brackets included. Ideal for restaurant patios, entryways, porches, mezzanines, vestibules, etc., and outdoor residential use.

Note: Winds in excess of 5 mph may require additional heaters to obtain desired comfort levels.

WARNING: Use in well-ventilated or open areas and always observe published clearances to combustibles.

Portable LP Gas Heaters

Dyna-Glo™

Innovative, compact heaters require no batteries or electricity and can provide efficient 360° heating. The variable heat output control allows you to adjust unit to your desired setting.

Note: LP tank not included.

HeatAround 360 and HeatAround 360 Elite—Compact models feature an oxygen depletion sensor that shuts off heater when the device detects a reduction of oxygen in the room and a tip-over shutoff switch. Piezo ignitor for easy matchless igntion. Design has a swivel-out regulator that eases tank or hose installation. No. 54EP07 can be connected to a 20-lb. propane tank for outdoor use with an optional hose/regulator, sold separately. No. 54EP08 includes 2 swivel regulators that allow you to easily attach up to 2 propane tanks. All heaters are ideal for temporary indoor heating in garages, workshops, and for outdoor patio/backyard and jobsite heating.

Tank Top—Heater features a safety shutoff valve and a CSA certified tip switch for safety. Compact model includes a stainless steel heat reflector, rustproof chrome guard, and a quick connect tank connection. For use in the temporary heating of buildings or structures under alteration, construction, or repair.

No. 16W290

▪ 120V

Provide quiet operation with fuel-efficient direct-fired design. Feature a 20-ft. remote start thermostat, totally enclosed flame, airflow safety devices, and enclosed electronics. 12-ft. extendable ducting available for all models. Designed with dependable, electronic spark ignition. Easy to transport with lift handles and heavy-duty wheels. CSA Certified.

No. 3VE55

No. 16W280

No. 5PFW3

Portable Gas-Fired Forced-Air Heaters

▪ 120V

Deliver reliable, directional heat.

Note: Gas tank not included.

Dayton®—Adjustable heat angle, fuel safety shutoff, and overheat Auto-Off. No. 3VE55 has piezo ignition and single heat setting. LP units include 15-ft. hose and regulator.

L.B. White®—Corrosion-resistant heaters feature 3-trial ignition system, and the industry's heaviest gauge combustion chamber and burner plate. Have variable heat output while 170 and 400 models have thermostatic temperature control, and the 125 and 170 models have an adjustable front leg. Ultra models are self-diagnostic. All models are CSA Certified.

Sure Flame®—Dual fuel; runs on LP and natural gas. Includes air flow switch and Hi limit switch. Steel construction. CSA Certified for unattended operation.

No. 16W292

No. 1WVL8

Portable Gas-Fired Convection/Radiant Heaters

Lightweight heaters require no electricity for operation. Use in well-ventilated or outdoor areas. CSA Certified, except No. 16W294.

Note: Gas tank not included.

CONVECTION

Heat open areas quickly.

Dayton®—Flame safety system and piezo ignition. Include 10-ft. hose and regulator. Nos. 6BY71 and 6BY73 feature Low/Med./High settings. No. 6BY74 has adjustable heat setting from Low to High.

L.B. White®—

Corrosion resistant with adjustable output control; most units provide 360° heat output. Nos. 16W293 and 16W292 feature piezo ignition and enclosed stainless steel burner. Nos. 16W295 and 16W294 have a cast-iron burner.

RADIANT

Warm objects, not air. Wraparound screen for added safety. Low-pressure burner system; includes regulator.

Monterey Top-Vent Gas Gravity Wall Furnaces

WILLIAMS Comfort Products

- Piezo ignitor for easy lighting
- Wall thermostat included (no electricity required)
- Optional automatic blower accessory and venting kit, sold separately

High efficiency furnaces are ideal for apartments, cabins, large single rooms, and residences. Features include stainless steel burners and ceramic coated combustion chambers, ½" NPT gas connection, and 4" oval and round B-vent. White enamel, powder-coated exterior cabinet. 10-yr. manufacturer's warranty on combustion chamber. Furnaces are CSA Certified.

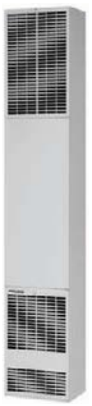
Forsaire Top-Vent and Direct-Vent Gas Counterflow Furnaces

WILLIAMS Comfort Products

- Piezo ignitor or intermittent spark ignition systems
- Wall thermostat included

Easy-to-install furnaces include a counterflow blower that pulls in cool room air, warms the air, then quickly delivers warmth where it's needed. All models feature stainless steel burners, ½" NPT gas connection, and a 4-ft. service cord. Venting not included. White enamel, powder-coated exterior cabinet. 10-yr. manufacturer's warranty on combustion chamber. Furnaces are CSA Certified.



Top-Vent—Furnace can be installed on an inside or outside wall and vented through the roof.

Direct-Vent—Unit can be installed on an outside wall.

Direct Vent (Through-the-Wall) Gas Gravity Heaters

WILLIAMS Comfort Products

- Piezo ignitor

Vent directly through outside wall. Sealed-combustion design draws in combustion air from outside and exhausts it outside through a single wall opening. Ideal for applications with direct access outside for venting including cabins, garages, living rooms, patios, porches, and sleeping areas. Features include 9"-dia. vent, ⅜" NPT gas connection, and vent material for walls up to 9" thick. White enamel, powder-coated exterior cabinet. Optional blower accessories provide fast heat circulation. 10-yr. manufacturer's warranty on combustion chambers. Heaters are CSA Certified.

Enclosed and Radiant-Front Vented Gas Console Heaters

WILLIAMS Comfort Products

- Piezo ignition
- Included thermostat

Combine the comfort and efficiency of radiant and circulated heat. No electricity required. 10-yr. manufacturer's warranty on combustion chambers. Perfect replacement for coal, oil, and wood heaters, and ideal for most locations where continuous power is an issue including cabins, sheds, and temporary housing. Can be used as a heat source in large and small areas and patios. ½" NPT gas connection. Black powder-coated exterior cabinet. Firelog Front models provide a fireplace-like glow. 35,000 to 65,000 BtuH models use optional Blower No. 36FK85. All heaters are CSA Certified.

Gas-Fired Unit Heaters

Dayton

- 120V
- Field convertible combustion type
- Direct spark ignition
- 83% thermal efficiency
- Tubular heat exchanger
- Power vented

All heaters are ETL and C-ETL Listed.

No. 55FG84

Propeller-Type—Low static pressure propeller heaters are designed to be suspended within the space to be heated. These heaters are not to be connected to ductwork.

Blower-Type—High static pressure centrifugal blower units are designed for heavy duty applications such as continuous operation or where a single unit heater must do the entire heating job in a large area. May be used with standard adjustable louvers, with short duct runs, or discharge nozzles for spot heating. Good for applications where low sound levels are required.

No. 2RYU7

Gas-Fired Low-Profile Unit Heaters

- 120V
- NG (LP conversion kit included)
- Direct spark ignition system
- Field-convertible for separated combustion application with approved vent kit
- Power venting allows horizontal venting through side walls
- Tubular heat exchanger and single burner design

Multitapped mounting rails allow multiple O.C. distances. ETL Listed in accordance with both Categories I and III venting requirements. Approved for installation in residential garage, commercial, and industrial applications. 24V thermostat required (not included); see page 3023.

Note: For altitudes above 2000 ft., consult owner's manual prior to installation for proper adjustments.

Use single- or double-wall vent pipe when venting vertically, or single-wall pipe when venting horizontally.

Gas-Fired High-Efficiency Unit Heaters

- 115VAC
- NG (LP conversion kit included)
- Field convertible combustion type
- Direct spark ignition
- Tubular heat exchanger
- Power vented

Heaters provide up to 99% maximum efficiency at full turndown with 95+% certified efficiency at high fire. This increased efficiency reduces emissions and fuel usage. Units auto-adjust the air/fuel mixture for altitude. ETL and C-ETL Listed.

Dayton

Vent-Free Gas Heaters

- Piezo ignitor for matchless pilot ignition

Require no electricity or outside venting, and are ideal for providing supplemental heating in smaller areas such as a basement or garage. Heaters have a cool-touch stainless steel cabinet and a stainless steel front grille. For safety, all units feature an oxygen depletion sensor that shuts off the heater when the device detects a reduction of oxygen in the room. CSA Certified.

Gas-Fired High-Intensity Infrared Space Heaters

- Provide efficient, reliable infrared heat
- Electronic ignition; 100% automatic gas shutoff
- Noncorrosive aluminum and stainless steel construction
- Preassembled and ready to install

Compact modular heaters are great for spot heating and provide proven fuel savings over unit heaters. High-intensity ceramic burners generate concentrated infrared energy, which is directed to floor level to warm people, objects, and the surrounding air. Feature highly polished aluminum reflector, water-resistant circuitry, and mounting chain.

Dayton

Installation information: ½" NPT gas inlet. Natural or mechanical ventilation required. Heaters are CSA Certified for U.S. and Canada.

Note: Not for residential use. Must mount 20° to 35° from horizontal, preferably facing inward around the perimeter of the heated area.

Gas-Fired Infrared Tube Heaters

Dayton

- Quiet, clean infrared tube heating is more energy efficient than unit heaters
- Designed for hard-to-heat environments
- Aluminized steel and aluminum construction
- Easy-to-install slip-fit design

Highly polished reflector adjusts from 0° to 45° to direct energy to floor level, and provide optimal heat coverage. Units are equipped to accept outside combustion air from sidewall in dirty or contaminated environments using inlet cap No. 3F837 (sold separately). Use in factories, warehouses, loading docks, aircraft hangars, auto service garages, ice rinks, workshops, patios, etc. Approved for vented (sidewall or roof) and unvented use. Two units may be commonly sidewall vented using No. 2F211 (sold separately) and controlled by a single thermostat (see page 3024). Units can be installed in L or U configurations using No. 3TZ71 or No. 3F835 (sold separately). All models include mounting chains, stainless steel flexible gas connector, and gas shutoff. Heaters are CSA Certified for U.S. and Canada.

Note: Heaters are not for residential use.

In-Floor Vented Gas Heaters

- Piezo ignition
- Wall thermostat included

No electricity required. Heaters can provide large room or even whole home comfort, and are ideal for original or replacement heating. Can be used for primary residences, but are suitable for most locations where continuous power is an issue including cabins, sheds, and temporary housing. Equipped with an automatic grille temperature control. 10-yr. manufacturer's warranty on combustion chambers. CSA Certified.

Water/Steam, Header-Type Coil

Water-Only, Serpentine Coil

Vertical Louver Kit

Dayton

Suspended Horizontal Hydronic Unit Heaters

- 115V
- Max. operating pressure: 150 psi

Each manufactured coil is submersion tested at 200 psi to assure coil is leak-free. Air flow is directed by manually adjustable louver blades. ETL Listed. Motors smaller than ⅓ HP are totally enclosed; ⅓- to ½-HP are open frame. Suitable for use in heating warehouses, manufacturing facilities, garages, and other large, open, nonexplosive, noncorrosive areas.

Note: Units having non-OSHA-type fan guards must be mounted at least 8 ft. above the floor.

WATER/STEAM

Header coil construction elements and heavy-wall tubing. Element tubes are brazed into the extruded header junctions. Pipe connection saddles are made of cast bronze and are brazed to the copper headers.

WATER-ONLY

Serpentine coil construction. Tubing is ⅜" copper. Requires ½" I.D. fitting for connection.

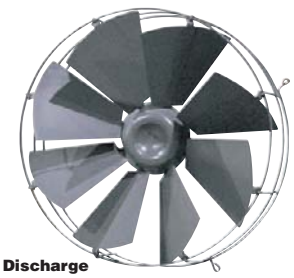
Suspended Vertical Hydronic Unit Heaters

Dayton®

- Max. operating pressure: 75 psi

Each manufactured coil is submersion tested at 375 psi to assure coil is leak-free. Air ports are stamped into the top plate for easy conversion of low-output units. For use in spot heating, assembly lines, warehouses, manufacturing facilities, garages, high bays, and any large open areas. Fan guard sold separately, this page. Single-phase motors are 115V; 3-phase motors are 230/460V. All are ETL Listed.



Accessories—OSHA-type fan guards are for applications under 8 ft. in mounting height. Discharge diffusers help direct the discharge to the floor. OSHA guard and diffuser cannot be mounted on the same unit.

Gas-Fired Whole-House Hot Water & Steam Boilers

Cast-iron heat exchanger is assembled with push nipples and stainless steel burners.

ARUBA 4 Series—Low-profile, compact design with built-in draft diverter and the aquastat mounted directly into the heat exchanger. Spill switch detects blocked vent. AHRI, ASME, and ETL and C-ETL Listed.

BERMUDA Series—Low-profile, compact design with built-in draft diverter. Spill switch detects blocked vent. AHRI, ETL Listed, ASME.

BALI Series—Integral draft fan system allows venting through a side wall. The aquastat is mounted directly into the heat exchanger. Pressure switch detects blocked vent. AHRI, ASME, and ETL and C-ETL Listed.

Oil-Fired Whole-House Hot Water & Steam Boilers

- Swing-open cast-iron burner door for easy service

Freeport Series—For residential and light commercial hot water heating systems. Circulates hot flue gases through the heat exchanger 3 times for optimum efficiency. Three-pass block design for full access to flue passages. Has Honeywell hi-limit combination aquastat relay and flame retention Beckett oil burner. AHRI, ASME, and ENERGY STAR qualified.

Tobago Series—For residential and light commercial hot water heating systems. Wet-base cast-iron heat exchanger surrounds combustion chamber for optimum heat transfer. Vertical section design. Features Honeywell combination aquastat relay. Can supply domestic hot water on demand. AHRI, ASME.

Kingston Series—For residential and light commercial steam heating systems. Wet-base cast-iron heat exchanger surrounds combustion chamber for optimum heat transfer. Vertical section design. Features probe-type low water cut-off. Equipped with connections to add indirect water heater for domestic hot water. AHRI, ASME.

Commercial Hydronic Baseboard Heaters

- Copper heater elements: max. pressure 194 psi at 300°F
- Steel heater elements: max. pressure 660 psi at 650°F

2-pc. design for simple installation; order heater element and enclosure separately. Sloped top prevents blocking of louvers. Enclosures and accessories have primed finish suitable for painting. Enclosures include top panel, front panel, partial back-plate, adjustable hangers with hardware, slide cradles, and brackets. Suitable for hot water or steam heating systems.

Note: Endcaps and accessories sold separately.

Drain Bypass, Continuous—Honeywell units have summer shut-off damper and antimicrobial humidifier pads. Nos. 6JJK8 and 6JJL0 include automatic damper and LED indicators. White-Rodgers units with reversible side panel allow easy-change left side or right side bypass installation. Models allow installation on non-level plenums and include a 24V transformer and humidistat for precise humidification control. Aprilaire models include a built-in bypass damper, reversible discharge for easy installation, a humidistat control and some models include the automatic digital control that provides perfect humidity for every room in your home.

Fan Powered, Continuous Drain—Cycles with heating system. Includes automatic damper and LED indicators. Aprilaire models have a built-in fan that pulls heated air directly from the furnace and is available with a digital automatic control.

Steam, Auto Flush—Corrosion-resistant and feature automatic humidistat, low water, safety cut-off switch, and built-in overflow protection. No. 31TP32 has 6 capacities in 1 unit, depending upon voltage selected.

Steam, Electrode, Continuous Drain—Features HumidiPRO™ digital humidly control. Humidifier provides up to 22 gpd and can be remote mounted up to 5 ft.

Furnace Air Cleaners

Sun-Pure Catalytic Air Purification · Honeywell Home · Honeywell · Aprilaire · TRION Indoor Air Quality

Remove airborne contaminants such as smoke, dust, and mold in residential or light commercial forced-air heating and cooling systems.

Find more air cleaners on Grainger.com®.

For additional replacement air filters, see page 3049.

ELECTRONIC

Sun-Pure Ultra-Sun—Remove up to 98% of allergens down to 0.3 microns. Help neutralize NOx and carbon monoxide. Feature filter and UV lamp alerts.

Honeywell Home—Capture up to 98% of particles (3 to 10 microns). Wireless indicator alerts when cells need washing. Static pressure drop is 0.26 WC at max. air flow.

Aprilaire®—Traps particles as small as 0.03 micron including those laden with influenza viruses, and is up to 80% efficient on particles as small as 0.01 micron.

Trion®—Up to 95% efficiency per ASHRAE Standard 52.1. Washable Forever Filter®.

MEDIA

Honeywell—Captures particles as small as 0.3 micron. Static pressure drop is 0.23 WC at 500 fpm. MERV 11.

Trion®—Features pleated mechanical 5"-deep filter which maintains and increases efficiency with low air resistance; 0.24 WC pressure drop at rated air flow. MERV 8, MERV 11, and MERV 13.

Aprilaire®—SelfSeal™ design improves performance. Nos. 31TP14 to 31TP17 can trap sub-micron particles including bacteria and viruses. MERV 11 (Nos. 31TP14 to 31TP17 are MERV 13).

Whole-House Dehumidifiers

- Humidity range: 40 to 80% RH
- Ambient temp. range: 40° to 140°F
- 115V/60 Hz

Include a washable MERV 8 filter.

Whole-House Dehumidifiers—Operate independently or in conjunction with an existing central air conditioning system. Units are lightweight, compact, and can fit under HVAC equipment or in most crawl spaces. Adjustable duct collar provides side or top discharge options. No. 31TP38 is ENERGY STAR qualified.

Aprilaire®

Dehumidifier Control—Adjusts humidity setting or turns dehumidifier On or Off. Can be used as an external control when mounted in the same space as the dehumidifier, or as a remote control where the control unit is located away from a difficult-to-access dehumidifier.

Whole-House Dehumidifiers

Honeywell Home

- Humidity range: 0 to 99%
- Ambient temp. range: 34º to 135ºF
- 120V/60 Hz

These side-ducted models for houses or small buildings can stand alone or be integrated into a central heating/cooling system to remove excess moisture. Feature a separate control for ventilation that allows the onboard blower to introduce fresh air into your house when dehumidification is not required. MERV 11 filter efficiency. ETL Listed, UL Listed, and CSA Certified. ENERGY STAR qualified.

DUCTMATE®

Condensing Unit Braces

- Engineered wall-mount bracket for air conditioners, heat pumps, and other equipment
- No site preparation or leveling

No settling. Good for coastal and flood-prone areas or where hurricanes, snowfall, mud, or steep grades are a concern. Mounting fasteners not included.

Note: Because of the wide range of wall materials (brick, concrete, wood, etc.) the mounting is the responsibility of the installer.

Mounting Brackets

Mounting Block

Riser

Equipment Mounting Accessories

Mounting Brackets—12 ga. powder-coated steel with prepunched holes; 600-lb. load rating. For hanging A/C condensers and heat pumps outside at any height.

Mounting Block—Raises furnace 1 1/2" for quiet, dry operation. Each block handles over 500 lb. Peel-and-stick installation.

Risers—Stable, sturdy, plastic risers elevate condensers, heat pumps and air handlers. Butyl mastic on top and bottom prevents slipping and reduces vibration and noise.

AMERIVENT®

Type B Gas Vent Components

- Requires 1" clearance to combustibles
- Snap-lock joints
- UL Listed
- Accepted by AGA, NFPA, HUD, NBC, and UBC

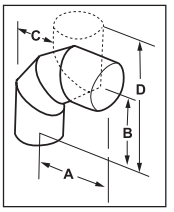
Gas Vent Pipe Sections—Rugged, double-wall construction with aluminum alloy 1100, 3003, or 3105 inner pipe and corrosion-resistant galvanized steel outer pipe. Snap-lock coupling ends.

Adjustable Gas Vent Pipe—Fit onto standard pipe sections. Telescope adjusts from 3" to 10".

Standard Tees—Branch and trunk diameters are the same size.

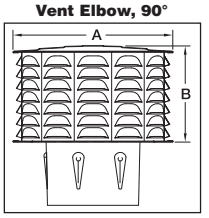
Adjustable Gas Vent Elbows, 90°—Constructed of 4 sections for smoother bends and less resistance. Adjusts from 0° to 90°.

Vent Caps—Designed to prevent spill-back of waste gases into structures. Permit termination of vents at minimum height necessary above roof.



Adapters—Universal adapters feature snap-lock couplings on 1 end, and slip joints on other. When used to join 2 UL Listed gas vent systems, the entire system maintains the listing.

Furnace/Water Heater Kits—Kits include cap, storm collar, flashing, draft hood connector, and 12" adjustable length. Most installations require additional pipe lengths and adjustable 90° "L" connector.



Firestop Support Plates—For supporting Type B gas vents starting at appliance level while also serving as a firestop.

Standard Tee

Adjustable Gas Vent Elbow, 90°

Smoke Emitters

Rapidly produce dense smoke for leak detection and air-flow analysis. Suitable for HVAC ductwork, exhaust ventilation systems, fire systems, leak testing of boilers, tanks and other enclosures, and air flow testing of chimneys and flues. No. 3KLJ7 can be daisy-chained for longer smoke production. Use matches or pellets when smaller volume of smoke is needed.

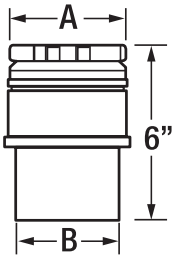
Single-Wall Connector Systems

AMERIVENT®

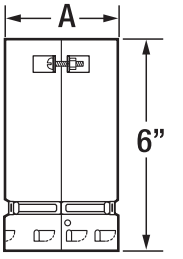
Single-wall flexible vent connector connects one or more appliances to double-wall Type B Gas Vent. Use for listed gas appliances with a draft hood or other gas appliances listed for use with Type B Gas Vent.

Flexible Pipe: 0.012" aluminum alloy 3003. Single wall pipe ends: 0.018" aluminum-zinc coated steel. Rigid components: 0.018" aluminum-zinc coated steel. Clearance: 1" to combustibles. Do not enclose. Do not pass through walls, floors, or ceilings.



Appliance Connector—Sized to fit outlet. Use sheet metal screws for code approved appliance connection.

Universal Adapter—Short slip connection with Ameri-Flex single wall snaplock base.



Vent Pipe Hanger—Provides 1½" spacing (Order same size as pipe diameter).

Reduction Wye—Features branch and/or base with smaller diameter than trunk size. Cap connection for furnace and water heater in common connector.

Flexible Pipe Section—Single wall corrugated aluminum connects from the appliance to Type B Gas Vent. May be compressed 4" per foot to shorten lengths. Cap ends offer snaplock design.

REGIN HVAC PRODUCTS, INC.

Smoke Emitters

Produce clean, nontoxic, oil-free smoke to quickly find air-flow leaks in heat exchangers, air ducts, chimneys, tanks, boilers, and piping. Won't stain clothing or building interiors. Contain no explosives. Also used for fire drills and to test smoke alarms/detectors.

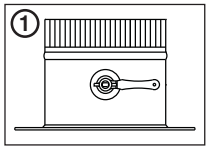
Duct and Fittings



GSI

GreenSeam® Plus Snap-Lock Pipe is self-sealing duct for commercial and residential applications. Engineered with a LEED® qualifying zero-VOC gasket; eliminates additional sealing along the longitudinal seams and transverse joint. When used with GSI sealed fittings, GreenSeam® Plus system reduces energy costs and increases overall system efficiency. Each box contains five 5-ft. sections (25-ft. total). Note: Call 1-800-GRAINGER (472-4643) for specialty ordering information.

Chimney Liner Kits

AMERIVENT®

Allow you to easily line a masonry chimney. Aluminum models are suitable for Category 1, gas-fired appliances with B-vent, or appliances with a draft hood. They include a liner, rain cap, flashing, B-vent connector, and mortar sleeve. Stainless steel kit is ideal for natural draft appliances using gas, oil, or wood. Includes a liner, rain cap, flashing adapter, flashing, flexible connector, tee, and tee cap. Pull Downs Nos. 40LJ33 and 40LJ39 let you stretch and lead the flexible liner down the chimney.

NORDFAB Ducting

Duct & Fittings

Quick-Fit™ Pipe— Laser welded seam prevents leakage; rolled edge on ends allows quick connection with Quick-Fit™ clamps.

Quick-Fit™ Duct Clamps with Pin—Open and close quickly; provide a tight seal. One connection clamp required to join 2 components.

Quick-Fit™ Adjustable Nipple—Use to provide variable length adjustment of Quick-Fit™ ducting system. Black rubber O-ring included.

Quick-Fit™ Angle Flange—Industry standard flange.

Quick-Fit™ Angle Flange Adapter—Use for quick connection of Quick-Fit™ pipe, fittings to flanged pipes or fittings.

Quick-Fit™ End Cap—Use with Quick-Fit™ Clamp to cap off an unused ducting port.

NORDFAB Ducting

Duct & Fittings

Quick-Fit™ Elbow—4"- and 7"-dia. elbows are press formed; others are segmented.

Quick-Fit™ Manual Blast Gate—Cast aluminum body.

Quick-Fit™ SD Automatic Blast Gate—Standard 120V control and 75 psi air pressure.

Quick-Fit™ NFES Automatic Blast Gate—Standard 120V control and 75 psi air pressure. Single cylinder, except Nos. 29RP19 to 29RP22 are 2 cylinder.

Quick-Fit™ Router Hood—Standard opening 6" x 12". Edges are folded to inside for safety.

Quick-Fit™ Vibration Isolator—Helps keep vibration from passing from the fan to the ducting system.

Quick-Fit™ Ball Joint—Allows 22° off-center movement. Ideal for machines with moving dust ports.

Quick-Fit™ Jet Cap—Helps prevent moisture from entering the ductwork.

Quick-Fit™ HJ Pipe Hanger—Connects directly to ceiling and minimizes pipe movement.

Quick-Fit™ Butterfly Valve—Standard locking quadrant handle enables user to regulate air volume in clean air applications.

Modulating

Control Dampers

Note: Additional sizes available on Grainger.com®.

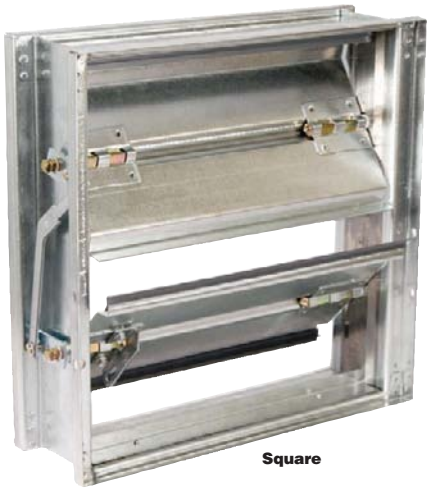
Automatic—Adjustable close position range stops; shipped as power closed/spring return open damper. Male/crimped, female/uncrimped ends connect to rigid or flexible round duct. 1" wc rated. 2-wire installation, third wire option.

Retrofit Zoning—Power open/power close actuator draws 2.5 VA, allowing multiple dampers per zone. 3-wire installation uses conventional thermostat wire.

Honeywell Home Honeywell

Fresh Air—Adjustable open position range stops; shipped as power open/spring return closed damper. Male/crimped, female/uncrimped ends connect to rigid or flexible round duct. 1" wc rated.

Modulating—With 24VAC, floating-control motor. For bypass and zone damper control. 90-sec. power-open, power-closed actuator. Screw terminal connection.



Conventional—Single-blade dampers for use with actuators Nos. 2HEZ5 or 2HEZ9 to control air flow.

Motorized Hat Channel-Style Dampers

- 100 to 240V
- 50/60 Hz with end switch
- Exhaust or supply
- Mount: horizontal or vertical
- Max. velocity: 3500 fpm

Regulate airflow in medium- and low-pressure commercial applications. TPV louver seals and stainless steel jambs minimize leakage. Channel frames for installations inside walls or ductwork.

Actuator is internally installed. Mill-finish extruded aluminum frame (5" deep x 0.1" thick) and louvers (0.08" thick). Plated steel linkage and pivot pins.

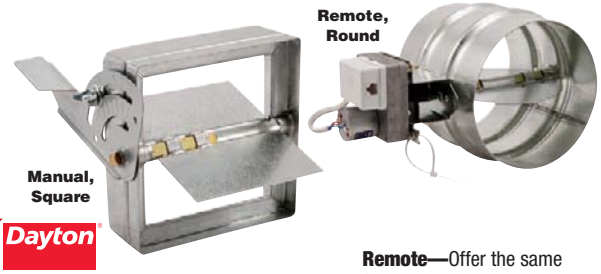
Dayton

Fire Dampers

- UL, NFPA, IBC, MEA, CSFM
- Accommodate airflow in either direction
- Fire-resistance rating: 1½ hr.
- Max. temp.: 165°F
- Curtain blade style (square & rectangular); single-blade (round)
- NFPA 80 requires retaining angles



Dynamic
- Steel spring-assist closing
- Velocity rating: 2,000 fpm
- Pressure rating: 4" wg

Static—For zero-pressure during damper closing. Vertical-mount models close via gravity. Horizontal models have spring-assist closing.

Flexible Duct

Insulated

- Rated positive pressure: 10" WC per UL 181
- Velocity: 5,000 fpm
- Standard lengths: 25 ft.
- Flame spread/smoke developed: < 25 / < 50
- Rated for indoor use

Recommended operating press.: ¾" WC neg., all dia.; 6" WC pos., all dia. except 4" WC pos. for 14" to 18" dia. Temp. range: uninsulated duct -20° to 180°F; insulated duct -20° to 140°F @ max. press. and -20° to 180°F @ 2" pos. WC max.

Code Compliance—UL 181, NFPA 90A and 90B, ICC, HUD, Cities of Chicago, New York, San Francisco, and County of Dade (Fla.).

Note: Check with the local code body having jurisdiction in your area to determine applicable codes.

UV Exposure—Flexible duct is for indoor use only and should not be installed in direct or indirect sunlight. Installations where sunlight enters through turbine vents, skylights, canopy windows, etc., should be avoided.

Insulated—Feature double-ply vapor barrier with tridirectional reinforcements. All-purpose ducts are gray polyester. Premium ducts are metallized polyester.

Note: R-Values are in accordance with ADC Flexible Duct Performance and Installation Standards (2003) using ASTM C-518 at installed wall thickness on flat insulation only.

Uninsulated—Class 1 air connector is a triple lamination of metallized polyester, aluminum foil, and polyester film, encapsulating a steel wire helix.

Diffusers, Dampers, and Collars

GRAINGER APPROVED

4 WAY Adjustable Diffuser

Diffusers—Round diffusers, with overlapping step-down rings, are compatible with butterfly dampers. Square diffusers provide high-volume air diffusion; multilouver models control air volume. Perforated diffusers have a clean, unbroken-plane look and reduce noise in low-volume air applications.

Diffusers, Adjustable Filtered—Separate directional diffusers on 4 sides, to provide air flow control. Compatible with T-bar ceilings. Connect duct to back pan and snap closed. Back pan and electrostatic filter included.

Butterfly Dampers—Adjust through center hole in diffuser; removable handle included.

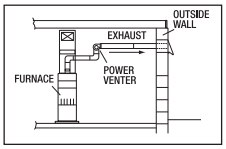
High-Temperature Sidewall Power Venters



115V. Mechanically vent Category 1 heaters through a wall, eliminating the need for a traditional chimney. Include UC1 heater interlock control and fan proving switch. Interlock with any 24/120VAC burner circuit. Feature adjustable pre/post purge, LED status indicators, and fault code memory. Vent hood No. 4C845 is recommended for power venters Nos. 4KA72 and 4KA73.

Ideal for sidewall vent furnaces, boilers, water heaters, pool heaters, and unit heaters. Use for electric to gas conversions, heating equipment upgrades, new construction, and replacing chimneys.

TJERNLUND

TJERNLUND

High-Temperature Vent Hoods

Designed to efficiently terminate horizontal vent runs handling flue gases from furnaces, unit heaters, and boilers. Made of 18-ga. corrosion-resistant aluminum alloy. No. 4C845 has built-in heat shield which provides clearance from combustible material contained in walls. Can be used with sidewall power venters, this page.

Water Heater Vent Packages

TJERNLUND

Used to vent millivolt gas water heaters up to 75 ft. away from a sidewall. Upgrade water heaters from electric to gas in renovations or new construction where no chimney exists. Wired with 25-ft. control cable. Linear limit spill switch connects to thermocouple junction adapter to lock out heater if draft is insufficient. Inlet and outlet are 3" on No. 5C083, 4" on No. 2FRU6. Post-purge timer keeps unit operating at end of burner cycle. Gas diaphragm switch with aluminum tube connection turns unit on and off with gas flow to water heater. Heavy-duty vent hood and 6-ft. power cord. CSA Certified.

Rooftop Inducers

TJERNLUND

- Powder-coated clamshell housing allows easy installation, inspection, and service
- Stainless steel blower wheel

Ideal solution for inaccessible and short-length vent connectors and chimneys, and for noise-sensitive locations. Optional rooftop stand supports weight of the inducer for metal chimney installations. Rooftop mounting maintains negative pressure throughout the entire vent system. ETL Listed to UL 378, UL 705, and CAN/CSA B255-M81.

Gas/Oil Applications, Nos. 5PWD8 and 5PWD9—Use to exhaust clothes dryer vents and exhaust chases serving multiple floors/sources. Pair with Controller No. 35UP43 for demand-based automatic speed control (sold separately on Grainger.com®). Also rated for use with non-condensing oil and gas heating equipment when installed with either No. 4KA76 (sold separately on Grainger.com®) or Interlock Controls No. 5PWE2 (sold separately, this page).

Solid Fuel Applications, Nos. 5PWE0 and 5PWE1—Use to increase fireplace draft to help eliminate fire starting and smoky backup problems. Included mounting kit attaches to both tile-lined and metal flues. Also includes wall-mount speed control.

		2,500,000-2,700,000	3,500,000-3,700,000	50

**Select inducer based on the BTU/hr. input of appliance rather than diameter of appliance vent outlet or chimney. **To determine equivalent ft., add the total length of straight vent pipe plus 10 ft. for each 90° elbow and 5 ft. for each 45° elbow.*

Item No.	Max. Face Area of Fireplace†
Solid Fuel Fireplaces	
5PWE0	14 sq. ft.
5PWE1	28 sq. ft.

† Determine vertical and horizontal face opening of hearth in sq. ft. (If open on sides or back, total all openings.)

TJERNLUND

In-Line Centrifugal Fan Duct Booster®

- Max. operating air temp.: 200°F; not for use with combustion exhaust
- Motor shaft should remain horizontal to the floor; mount on bottom of horizontal or side of vertical duct

Booster fits in round, square, or flat ducts as shallow as 3¼" deep. One 4" x 7" cutout is required. Unit attaches to ductwork with 4 sheet metal screws. May be actuated by No. 5C968 pressure switch. Steel housing and wheel. 1/70 HP, 1550 rpm, 115V, 60 Hz permanently lubricated motor is positioned out of the air stream. UL Listed.

Note: cfm rating is for 8" dia. pipe. Air flow will decrease slightly with smaller pipe.

Air Flow

In-Line Draft Inducers

TJERNLUND

Increase draft for gas- and oil-fired heating equipment. Variable draft control. Aluminized steel housing and wheel. 115V, 60 Hz. Use for long, horizontal vent connectors, undersized chimneys, and structures with a slight negative pressure. Fastening band included, except bandless screw attachment on Nos. 4C730 and 4C731.

Note: The performance table shows typical capacities when inducer is mounted on pipe sizes shown. Heating capacities shown are for 1000 Btu per cu. ft. of natural gas and for 139,000 Btu per gal. of #2 fuel oil.

Item No.	HP	H (in.)	W (in.)	D (in.)	Cut Out Req.
4C730	1/70	7 5/8	9	5 1/8	2 5/8 x 7 1/8

4C733	1/4	17	14 3/4	10	4 1/4 x 14 3/4

INTERLOCK CONTROLS

To comply with national mechanical codes, draft inducer must be interlocked with heater it serves.

Fan Proving Switch—Monitors pressure within the inducer housing. Required with Nos. 4C730 and 4C731 for CSA certification.

Universal Interlock Control—Provides heater interlock with any 24/120VAC burner circuit. Features adjustable pre/post purge, LED status indicators, and fault code memory.

In-Line Axial Fan Duct Boosters®

TJERNLUND

- 115V, 60 Hz

Designed for powered air intake and exhaust systems, or to boost air flow in hard-to-heat or -cool areas. Galvanized steel housing with built-in duct stop on the inlet and crimped edge on the outlet. Optional speed control No. 48C172 (sold separately on Grainger.com®) can be used on 6", 8", and 10" units only.

AMCA Certification Information

AIR PERFORMANCE

Dayton Electric Mfg. Co., Fantech, Inc., Vosterman's Ventilation, Inc., Soler & Palau, and Berner International certify that each of their respective models displaying the AMCA Seal in the HVAC section are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

SOUND & AIR PERFORMANCE

Dayton Electric Mfg. Co. & Broan-NuTone LLC certify that each of their respective models displaying the AMCA Seal in the HVAC section are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

WATER PENETRATION & AIR PERFORMANCE

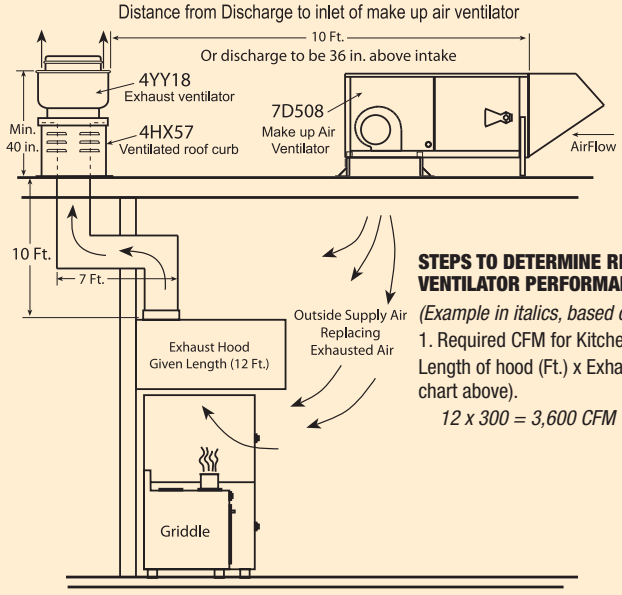
Dayton Electric Mfg. Co. certifies that the louvers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to Air Performance and Water Penetration ratings.

Exhaust Ventilation

Determining the correct exhaust CFM is one of the most critical application calculations, as it allows the ventilation system to perform as designed.

Commercial kitchen exhaust systems, in particular—with temperatures as high as 300°F and grease-laden atmospheres—must be designed to meet restaurant and food service application requirements.

Owners and installers must be aware of the following guidelines and governing codes when designing a kitchen ventilation system:



Types of Kitchen Equipment	Non-Grease Hoods	Grease Hoods			
	Gas/Electric Steamer Gas/Electric Oven Food Warmers Pasta Cooker Dishwasher	Smoker Rotisserie Pizza Oven	Combi-Ovens Gas/Electric Fryers Griddles Tilting Skillets Tilting Braising Pans Grill/Hibachi Grill Salamander	Upright Broiler Electric Char-Broiler	Gas Char-Broiler Mesquite Infrared Broiler Lava Rock Char-Broiler Wok Chain Broiler
*Exhaust Rate (Approx. CFM/ Linear Ft.)	200	250	300	400	550
Internal Resistance (Approx. Static Pressure)	0.5	0.5	0.625	0.75	1.00

For specific hood types, refer to the International Mechanical Code.

INSTALLATION

UL 762

Concerns the safety of roof- or wall-mounted power ventilators used with restaurant exhaust appliances, where heat/grease are typically encountered in the airstream.

NFPA 96

- **Discharge must be a minimum of 40" from roof deck**
- **Ductwork must be a minimum of 18" above roof deck**
- **Curb must be vented and have a grease trap and hinge kit**
- **No damper can be used in a kitchen application (unless part of the hood)**

STEPS TO DETERMINE REQUIRED EXHAUST VENTILATOR PERFORMANCE

(Example in italics, based on application drawing)

1. Required CFM for Kitchen Hood = _____

Length of hood (Ft.) x Exhaust rate (CFM/Linear Ft.) (Use chart above).

12 x 300 = 3,600 CFM

2. External Resistance (SP) = a. + b.

0.05 + 0.16 = 0.21

a. Duct Length (Ft.) = _____

Duct Length (Ft.) = 17

0.002 - 0.004 = Duct Resistance Factor (DRF), assuming air velocity is between 1000 and 1800 FPM

Duct Length x DRF = External Resistance (SP)

17 x 0.003 = 0.051 (SP)

b. Number of Elbows = _____

Number of Elbows = 2

0.080 = Resistance Factor Per Fitting, Elbow, etc.

Number of Elbows x 0.08 = Additional Duct Resistance (SP)

2 x 0.08 = 0.16 (SP)

3. Internal Resistance (SP) (Use chart above) + External Resistance (SP) = Total Resistance (SP)

0.625 (SP) + 0.21 (SP) = 0.836 (SP)

Exhaust Ventilation Performance =

3600 CFM @ 0.836 (SP)

Air Changes Recommended for Various Areas

To determine Air Volume (cfm), calculate volume of area (LxWxH) to be ventilated in cubic feet and divide by minutes per change (see table). Result will be cubic feet per minute, corresponding to fan ratings. One or more fans may be used to obtain desired cubic feet per minute.

Ventilated Area	Minutes Per Change	Ventilated Area	Minutes Per Change	Ventilated Area	Minutes Per Change	Ventilated Area	Minutes Per Change
Assembly Halls	3-10	Factories	4-10	Offices	5-12	Shops	5-10

Connecting with Grainger

Website: To register, sign in at Grainger.com®.

Phone: 1-800-GRAINGER (472-4643).

Mobile App: Download at the App Store or Google Play.

Branch: See Grainger.com for your nearest branch.

After-Hours Emergency Service Call:

1-800-CALL-WWG (1-800-225-5994).
If you are a Grainger account holder* and need a product immediately, even after business hours, call us and we'll open your local branch (available in most markets and a $50 fee may apply).

*We can establish a new account for business customers at the time of the emergency call if you do not have an account with us.

Terms of Sale

SUMMARY TERMS & CONDITIONS

Terms: The term "Customer" includes business customers as well as individuals. By placing an order, Customers accept and agree to Grainger's Terms of Sale, the full text of which can be found at Grainger.com and are incorporated herein by reference. The Terms of Sale contain a provision that any disputes will be resolved on an individual basis through arbitration. Grainger reserves the right to: (i) revise the Terms of Sale as found on Grainger.com at any time; (ii) accept or reject any order; (iii) limit the quantity of items purchased per order; and (iv) limit the number of orders that can be placed per day. Grainger does not guarantee the availability of specific quantities of any product listed in this Catalog at time of order placement.
Prices: "Web Prices" displayed on Grainger.com: (i) are offered to Customers that do not have other pricing arrangements with Grainger; (ii) are subject to the Terms of Sale on Grainger.com; (iii) are available for orders placed on Grainger.com, by phone, or at Grainger branch locations; (iv) do not include freight, handling fees, taxes, and/or duties; and (v) are subject to change or correction at any time and without notice. Business Customers that have other pricing arrangements with Grainger can view their prices and the applicable prices to which discounts, if any, are applied, when logged into their Grainger.com account. Export orders may be subject to other special pricing.
Sales Tax: Customers are responsible for payment of all applicable taxes, or providing a valid sales tax exemption certificate.
Shipping Charges: Products are shipped F.O.B. shipping point with all costs imposed by the carrier related to the shipment paid by Grainger and charged to Customer. C.O.D. shipments are not permitted. Fuel surcharges and other surcharges may be applied. Title and risk of loss pass to Customer upon tender of the shipment to carrier.
Payment Terms: Grainger accepts cash, checks, money orders, Visa, MasterCard, Discover, and American Express. For business customers with established Grainger credit, payment terms are net 30 days from the date of shipment or pick-up. If payment is not received within the 30-day period, Grainger may defer or cancel all or part of any shipment or order. Anticipation and cash discounts are not allowed.
Product Returns: For Grainger's current product return policy and instructions, go to grainger.com/returns. Grainger does not take title to returned products until the item is received by Grainger at the applicable return location. Proof of purchase is required in all cases. Product returns may be denied or made subject to restocking fees and other charges by Grainger.
Product Substitution: Products and/or country of origin may be substituted and may not be identical to descriptions and/or images in this Catalog or on Grainger.com.
Other Products and Services: Orders for export and products and services not listed in this Catalog are subject to separate terms and conditions; see Grainger.com.

CATALOG PRODUCT INFORMATION

Information about the products in the Grainger catalog is provided by the manufacturer and/or supplier. Every attempt is made to publish complete and accurate data but, because changes happen continuously, the timeliness and accuracy of information cannot be guaranteed. Grainger reserves the right to revise publishing errors in its catalogs.

SATISFACTION GUARANTEE TO ALL CUSTOMERS

Customer should contact Grainger if not satisfied with a product for any reason. Grainger will promptly provide an exchange or refund if the product is returned within 30 days of invoice with proof of purchase from Grainger.

GRAINGER LIMITED WARRANTY

ALL PRODUCTS SOLD TO CUSTOMERS ARE WARRANTED BY GRAINGER ONLY FOR USE IN BUSINESS, GOVERNMENT, RESALE, OR ORIGINAL EQUIPMENT MANUFACTURE AGAINST DEFECTS IN WORKMANSHIP OR MATERIALS UNDER NORMAL USE FOR ONE (1) YEAR AFTER DATE OF INVOICE FROM GRAINGER. AT GRAINGER'S OPTION, THE EXCLUSIVE REMEDY FOR ANY PRODUCT IT DETERMINES TO BE DEFECTIVE IN WORKMANSHIP OR MATERIALS WILL BE REPAIR, REPLACEMENT OR REFUND OF THE PURCHASE PRICE.

WARRANTY DISCLAIMER & LIMITATIONS OF LIABILITY

a. WARRANTY DISCLAIMER. EXCEPT AS SET FORTH HEREIN AND WHERE PERMITTED, NO WARRANTY OR AFFIRMATION OF FACT OR DESCRIPTION, EXPRESS OR IMPLIED, IS MADE OR AUTHORIZED BY GRAINGER. GRAINGER DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. GRAINGER ALSO DISCLAIMS ANY LIABILITY FOR CLAIMS ARISING OUT OF PRODUCT MISUSE, IMPROPER PRODUCT SELECTION, IMPROPER INSTALLATION, PRODUCT MODIFICATION, MISREPAIR OR MISAPPLICATION.

b. LIMITATIONS OF LIABILITY. ANY LIABILITY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, EXEMPLARY, OR PUNITIVE DAMAGES IS EXPRESSLY DISCLAIMED TO THE EXTENT PERMISSIBLE. FOR BUSINESS CUSTOMERS, GRAINGER'S LIABILITY IN ALL EVENTS IS LIMITED TO THE PURCHASE PRICE PAID FOR THE PRODUCT THAT GIVES RISE TO ANY LIABILITY.

CERTAIN STATE LAWS DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR THE EXCLUSION OR LIMITATION OF CERTAIN DAMAGES. IF THESE LAWS APPLY, SOME OR ALL OF THE ABOVE DISCLAIMERS, EXCLUSIONS, OR LIMITATIONS MAY NOT APPLY AND OTHER RIGHTS MAY BE AVAILABLE.

COMPLIANCE AND PRODUCT INFORMATION

Product information and Safety Data Sheets ("SDS") are supplied by the manufacturers. GRAINGER MAKES NO WARRANTIES AND EXPRESSLY DISCLAIMS ALL LIABILITY FOR ACCURACY OF THE PRODUCT INFORMATION OR ANY SDS.
To Request an SDS: Log on to Grainger.com and click on the "View the Safety Data Sheet" (SDS) for this item, email product.compliance@Grainger.com, or write to:
Grainger, Dept. B1L57, 100 Grainger Parkway, Lake Forest, IL 60045, U.S.A.
Refrigerant Customers: In accordance with the Federal Clean Air Act, sale of Class 1 (CFC) and Class 2 (HCFC) refrigerant will be restricted to resale purchases and/or to certified professional service technicians. To purchase regulated refrigerant products, all customers must present a certification card or sign a statement of resale to complete the purchase.
Product Compliance and Suitability: Grainger does not guarantee compliance or suitability of the products it sells with any laws, codes or regulations, nor does Grainger accept responsibility for construction, installation, and/or use of a product. Customer is solely responsible for reliance on or use of any product information, and for use or application of any product.
Availability: Certain products may not be available for sale in all areas.
Energy and Water Efficiency Information:
For identification of products and related information, go to Grainger.com.

PURCHASERS OF PRODUCTS USED WITH OR FOR POTABLE WATER:
The Federal Safe Drinking Water Act and regulations in CA, LA, MD, and VT prohibit plumbing products (including, but not limited to pipes, pipe fittings, solder, flux, plumbing fitting, etc.) used to convey water for human consumption that are not "lead free," as defined by the regulations. In order to determine your particular state's standards applicable to the products you purchase for use in or for potable water applications, direct your inquiries to the appropriate regulatory agency in your state. In order to determine the federal standards applicable to the products you purchase for use in or for potable water applications, visit http://water.epa.gov/drink/info/lead/index.cfm. For identification of products impacted by these regulations, go to Grainger.com.
California Proposition 65: California Proposition 65 is a regulatory notice requirement that entitles California consumers to special warnings for any one of the over 800-listed chemicals that California regulators have deemed to expose consumers to cancer or reproductive harm if consumers are exposed to those chemicals above certain threshold levels. The required warnings are as follows:

WARNING: Certain products in this catalog can expose you to chemicals which are known to the State of California to cause birth defects or other reproductive harm. For more information go to www.p65warnings.ca.gov.

WARNING: Certain products in this catalog can expose you to chemicals which are known to the State of California to cause cancer. For more information go to www.p65warnings.ca.gov.

If you have questions about whether any product that you are interested in ordering falls under California Proposition 65's warning requirements, please visit our website at Grainger.com with reference to that product. Similarly, if you have any questions about Proposition 65 itself, please visit www.p65warnings.ca.gov or the California regulatory agency website at www.oehha.ca.gov.

SOLUTIONS & SPECIALISTS **WITH ANSWERS**

SOLUTIONS THAT MATTER

We have a wide range of services to meet your unique business needs. Through our network of **qualified, insured and licensed** service providers, we can provide your business with **comprehensive solutions** that help you:

- **Maintain Environmental, Health & Safety Compliance**
- **Increase Worker Productivity**
- **Drive Energy & Facility Efficiency**
- **Reduce & Conserve Operating Costs**

For more info on Grainger's suite of strategic business solutions, contact your local Grainger Rep or visit grainger.com/graingerservices

JEREMY
Technical Product Support Specialist
13 years at Grainger

INDUSTRY KNOWLEDGE YOU CAN COUNT ON

TECHNICAL SUPPORT

Got a question you can't find the answer to? Our Technical Product Support Specialists are ready to help with:

- Compliance questions
- Product assistance
- Services and solutions to fit your needs, and much more

Stop by your local branch or call 1-800-GRAINGER

GRAINGER CONSULTING SERVICES

Grainger Consulting Services works with your team to understand your business, identify improvement opportunities and develop a plan to help guide you from start to savings.

grainger.com/consultingservices

METALWORKING & SAFETY SPECIALISTS

Our team of specialists is comprised of individuals with hands-on experience and industry expertise to help you work through challenging applications and identify cost-saving solutions.

Contact your Grainger Rep for more information.

Eligibility and/or availability is subject to certain qualifying criteria for some services.

GRAINGER®

FOR THE ONES WHO GET IT DONE

EVERY JOB IS IMPORTANT

In these extraordinary times, extraordinary people like you have stepped up to tackle the big things and the little things that matter. We're grateful for all you do.

For the ones who keep going, we're always here to help:

- > 24/7 Customer Service
- > Technical Product Support
- > 200+ Branch Locations
- > After-Hours Emergency Options
- > Invaluable Services and Resources
